

Subsea Guiding Systems

Imenco is the leading company within subsea guide wire systems, and we have a complete range of equipment including surface tensioners. Deep water systems have been in operations since 1996. Imenco deliver complete Guide Wire Systems to accommodate your subsea guiding requirements.

All Imenco Guidewire Anchors are ROV releasable, and have an emergency / alternative release with a shear pin arrangement. The Anchors are made from high strength stainless steel and have lifetime exceeding 20 years when normal maintenance is followed. Spare parts and auxiliary equipment available from stock. Documentation and certification.
